

Avinash Gundimeda

B.Tech Cybersecurity | 3rd Year | MERN Stack

Addanki, Andhra Pradesh
Phone: +91 9390373001
Email: avnashgundimeda@gmail.com
LinkedIn: linkedin.com/in/avinash-gundimeda
GitHub: github.com/avinashgundimeda

CAREER OBJECTIVE

B.Tech Cybersecurity student with hands-on experience in full-stack development using the MERN stack, along with knowledge of web security and machine learning. Experienced in building secure and scalable web applications and applying cybersecurity concepts to solve real-world problems. Seeking an internship opportunity to apply technical skills, gain industry experience, and contribute to meaningful projects in cybersecurity and secure software development.

EDUCATIONAL QUALIFICATION

Qualification	College / School	Location	CGPA / %	Passing Year
B.Tech	Mohan Babu University	Tirupati	8.4	2027
Class 12	Sri Saraswathi Junior College	Ongole	82%	2023
Class 10	Universal High School	Inkollu	97%	2021

TECHNICAL SKILLS

Programming: Python, Java, JavaScript
Web Development: HTML, CSS, React.js, Node.js, Express.js, Tailwind CSS, Framer Motion, Vite
Databases: MongoDB, MySQL
Tools & Technologies: Git, GitHub, VS Code, Arduino, VMware, Postman, Netlify, Cloudflare
Cybersecurity: Web Application Security, Breach Detection, VAPT Concepts, Network Security
AI & ML: Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, TensorFlow (Basics), Data Preprocessing, Feature Engineering, Model Evaluation
Game Development: Blender, Godot, Unreal Engine

PROJECTS

Online Code Compiler

A browser-based code compiler that allows users to write, run, and test code in multiple programming languages. Features a clean editor interface with real-time output rendering.

Technologies: Tailwind CSS, React.js, Node.js, Express.js, MongoDB

Breach-Checking Website

A web application to check if credentials have been exposed in data breaches. Integrated HIBP API for real-time breach data with a clean user-friendly interface.

Technologies: Tailwind CSS, React.js, Node.js, Express.js, HIBP API

Medical Insurance Premium Prediction

Developed a machine learning model to predict medical insurance premiums based on factors such as age, BMI, smoking status, gender, and region. Implemented regression algorithms to analyze healthcare data and generate accurate premium estimates.

Technologies: Python, Pandas, NumPy, Scikit-learn, XGBoost, Streamlit, Matplotlib

FlixMoviesInfo

A movie browsing and streaming platform fetching live data from TMDB API with in-browser playback. Deployed live on Netlify.

Technologies: HTML, CSS, JavaScript, TMDB API

COURSES & CERTIFICATIONS

- ReactJS — Modern React from the Beginning — Udemy (2025)
- JavaScript — The Complete JavaScript Course — Udemy (2025)
- Blender — Complete Blender Creator: 3D Modeling — Udemy (2025)

NON-TECHNICAL SKILLS

Communication | Problem Solving | Team Collaboration | Leadership | Time Management | Adaptability | Critical Thinking | Self-Learning

ACHIEVEMENTS

- Deployed FlixMoviesInfo, a live movie streaming platform using TMDB API, accessible on Netlify.
- Built a Breach-Checking Web Application integrating real-time API data for cybersecurity awareness.
- Developed an Online Code Compiler supporting multiple languages with real-time output.
- Built a Medical Insurance Premium Prediction model using XGBoost and Streamlit for an interactive interface.
- Built and deployed multiple full-stack projects independently through self-directed learning.

EXTRACURRICULAR ACTIVITIES

- Content Creator — Runs a YouTube channel focused on motivational and self-improvement content, building skills in scripting, video production, and audience engagement.
- Fitness & Discipline — Consistent gym training since mid-2024, developing physical discipline and a structured daily routine alongside academic commitments.
- Stock Market & Crypto Enthusiast — Actively follows equity markets and cryptocurrency trends, applying analytical thinking to real-world financial decisions.
- Game Development Exploration — Self-learning game development using Blender for 3D modeling, Godot for indie game prototyping, and Unreal Engine for high-fidelity game environments.

VOLUNTEER WORK

- Tech Awareness Drive — Participated in college-level initiatives to spread awareness about cybersecurity best practices and safe internet usage among students.
- Peer Support & Mentoring — Informally mentored junior students on web development concepts, helping them set up development environments and understand MERN stack basics.
