

AVINASH GUNDIMEDA

Cybersecurity Undergraduate | Seeking Internship Opportunities
+91 9390373001 | avinashgundimeda@gmail.com | [LinkedIn](#) | [GitHub](#) | Addanki, Andhra Pradesh

PROFESSIONAL SUMMARY

B.Tech Cybersecurity student (3rd Year) with hands-on experience in secure full-stack development, penetration testing tools, and real-world application security. Proficient in JavaScript, React.js, Node.js, and MongoDB, with exposure to Kali Linux, Burp Suite, and web application security principles. Built and published developer tools on npm and delivered multiple production-grade projects. Eager to contribute to challenging security or software development initiatives in a fast-paced environment.

TECHNICAL SKILLS

Programming Languages: Java, JavaScript
Frontend & Frameworks: React.js, HTML, CSS, Tailwind CSS, Electron.js
Backend & Databases: Node.js, Express.js, MongoDB
Cybersecurity Tools: Kali Linux, Burp Suite, nmap, OWASP Tools, Penetration Testing, Web Application Security
Tools & Platforms: Git, GitHub, VS Code, VMware, Postman, Vercel, Postman, npm
Others: Networking Concepts, Linux Administration, CLI Development, REST APIs

PROJECTS

Custom Backend CLI Tool (npm Package)

Dec 2024 – Present

Published an npm CLI package automating Node.js backend project scaffolding.

- Reduced backend project setup time by ~80% with a single-command initialization that generates Express.js + MongoDB production structure.
- Engineered full file-system scaffolding using Node.js fs module, including pre-configured routes, controllers, and middleware.
- Published to npm registry with versioned releases; adopted by developers for rapid backend bootstrapping.

Tech Stack: Node.js, Express.js, MongoDB, JavaScript, npm, CLI, fs module

BreachRadar – Data Breach Detection Web App

Oct 2024 – Nov 2024

Built a security-focused breach lookup tool backed by a 100K-record MongoDB dataset.

- Integrated live APIs and custom MongoDB queries enabling instant user data breach detection with sub-second response times.
- Implemented glassmorphism React frontend with efficient search reducing manual breach verification time significantly.
- Designed secure query handling to prevent injection vulnerabilities across the lookup pipeline.

Tech Stack: React.js, Node.js, Express.js, MongoDB, Tailwind CSS

MySystem – Real-Time System Monitor (Electron.js)

Sep 2024 – Oct 2024

Developed a cross-platform desktop app to monitor live system performance on Kali Linux and Windows.

- Achieved real-time CPU, memory, and process tracking with efficient OS-level data polling in Electron.js.
- Built responsive interactive UI with Tailwind CSS, improving resource visibility and management workflow.

Tech Stack: Electron.js, Node.js, JavaScript, Tailwind CSS

EDUCATION

B.Tech Cybersecurity Mohan Babu University, Tirupati	CGPA: 8.4 2027
Class 12 Sri Saraswathi Junior College, Ongole	82% 2023
Class 10 Universal High School, Inkollu	97% 2021

CERTIFICATIONS

ReactJS – Modern React from the Beginning | Udemy (2025) | JavaScript – The Complete JavaScript Course | Udemy (2025) | Blender – Complete Blender Creator: 3D Modeling | Udemy (2025)

ACHIEVEMENTS

- Published a Developer CLI Tool on npm reducing backend project setup time by ~80% with one-command project initialization.
- Built BreachRadar integrating live security APIs with 100K MongoDB records enabling instant breach detection for users.
- Developed MySystem desktop app with real-time CPU and memory tracking using Electron.js on Kali Linux.

EXTRACURRICULAR ACTIVITIES

- Content Creator – Runs 'Voice of Hustle' YouTube channel covering motivational and geopolitical content; builds skills in scripting, video production, and audience growth.
- Fitness & Discipline – Consistent gym training since mid-2025, demonstrating structured self-discipline alongside academic work.
- Stock Market & Crypto – Actively follows equity and crypto markets, applying analytical thinking to financial decisions.
